Providing Scholarships to Inspire Scholarships - January 8, 2010

It's time to prepare for the 2010-2011 school year!

Welcome back, City Academy families! Happy New Year! The holiday season is a time when we think about our families and what is most important in our lives. I hope that during this time you were also able to reflect on the importance of your child's education. I also hope that, as a result, you plan to submit your family's re-enrollment forms for the 2010-2011 school year.

Each year, you choose to make a sacrifice to enable your child to have access to a high-quality education. You consider City Academy's mission: to provide your child with an academically rigorous program within a nurturing environment. You decide that this fits the educational model you envision for your child. City Academy appreciates your dedication to your child's well-being—that's why we award over \$1.5 million in scholarship assistance to families each year. We are honored to partner with families like your own.

Reenrollment forms are due back to the front office no later than January 15th. If forms have not been submitted by this date and no effort has been made to contact the front office, we will assume this means you will not be re-enrolling for the upcoming school year and we will make your child's space available to prospective families. Thank you for your continued commitment to City Academy and your child's educational programming. Our work would not be possible without your unwavering dedication and support!

The finish line is in sight for our sixth graders!

Sixth grade families resumed class this week with a great deal on their respective agendas. They have one week to submit secondary school applications, along with four more weeks of long-awaited site visits to our region's finest college preparatory schools.

But sixth graders aren't just finishing applications, keeping up with schoolwork, and interviewing! They are also preparing to take the ISEE (Independent Schools Entrance Examination) this month.

In other words, January promises to be a busy and challenging month for our sixth grade students! As a wise person once said, "If being your best and trying your hardest was easy, then everyone would be doing it!" When you see our sixth graders in the hall this month, please encourage their continued momentum and wish them good luck on their exams, interviews, visits, and coursework.
